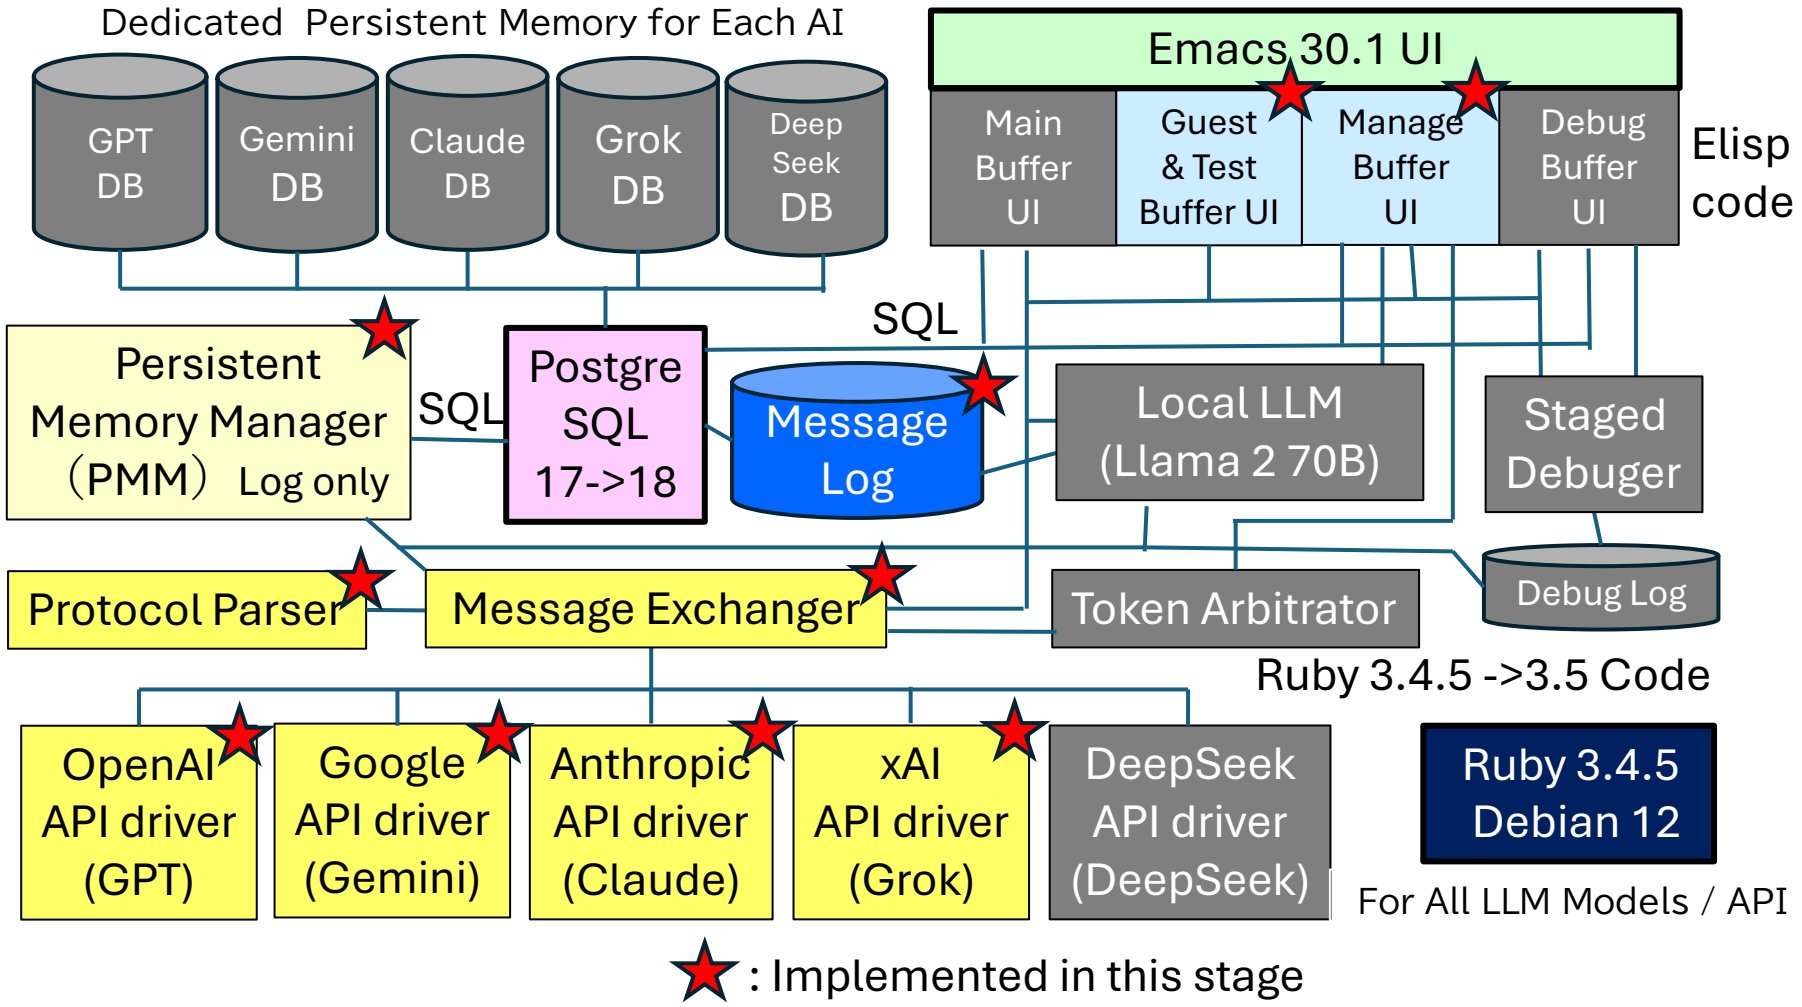
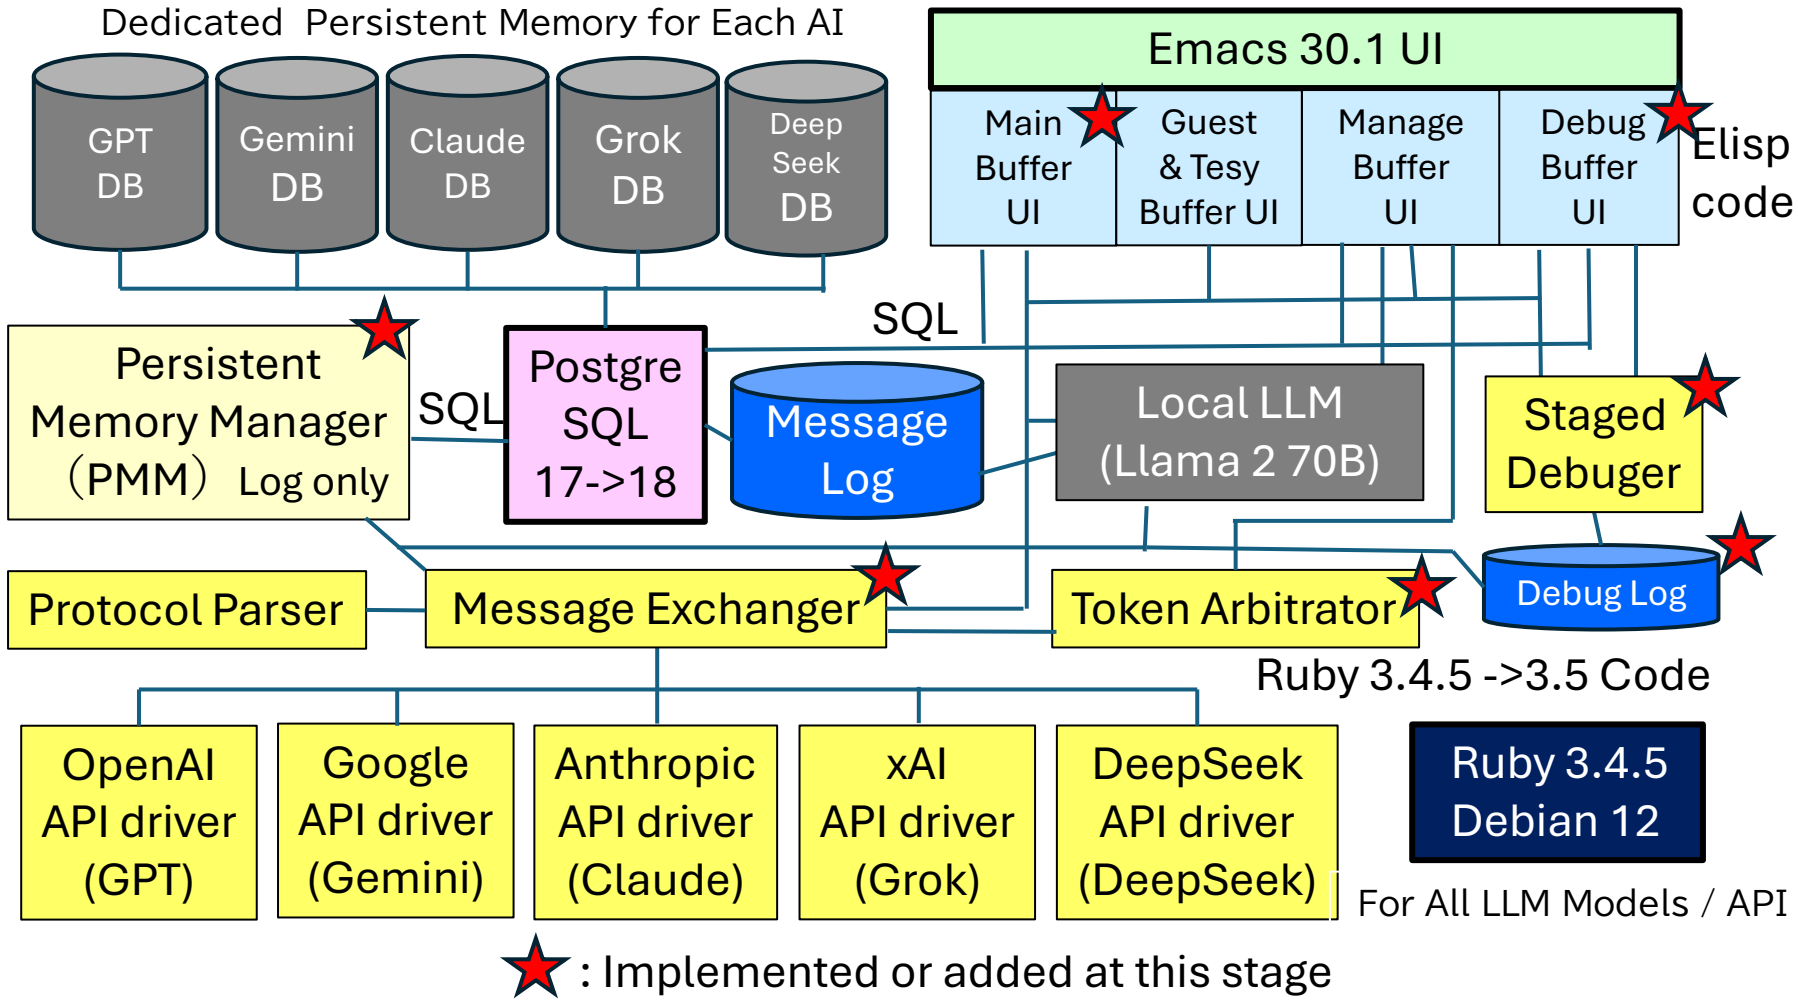
Warm Room Transport System Software block diagram Stage1



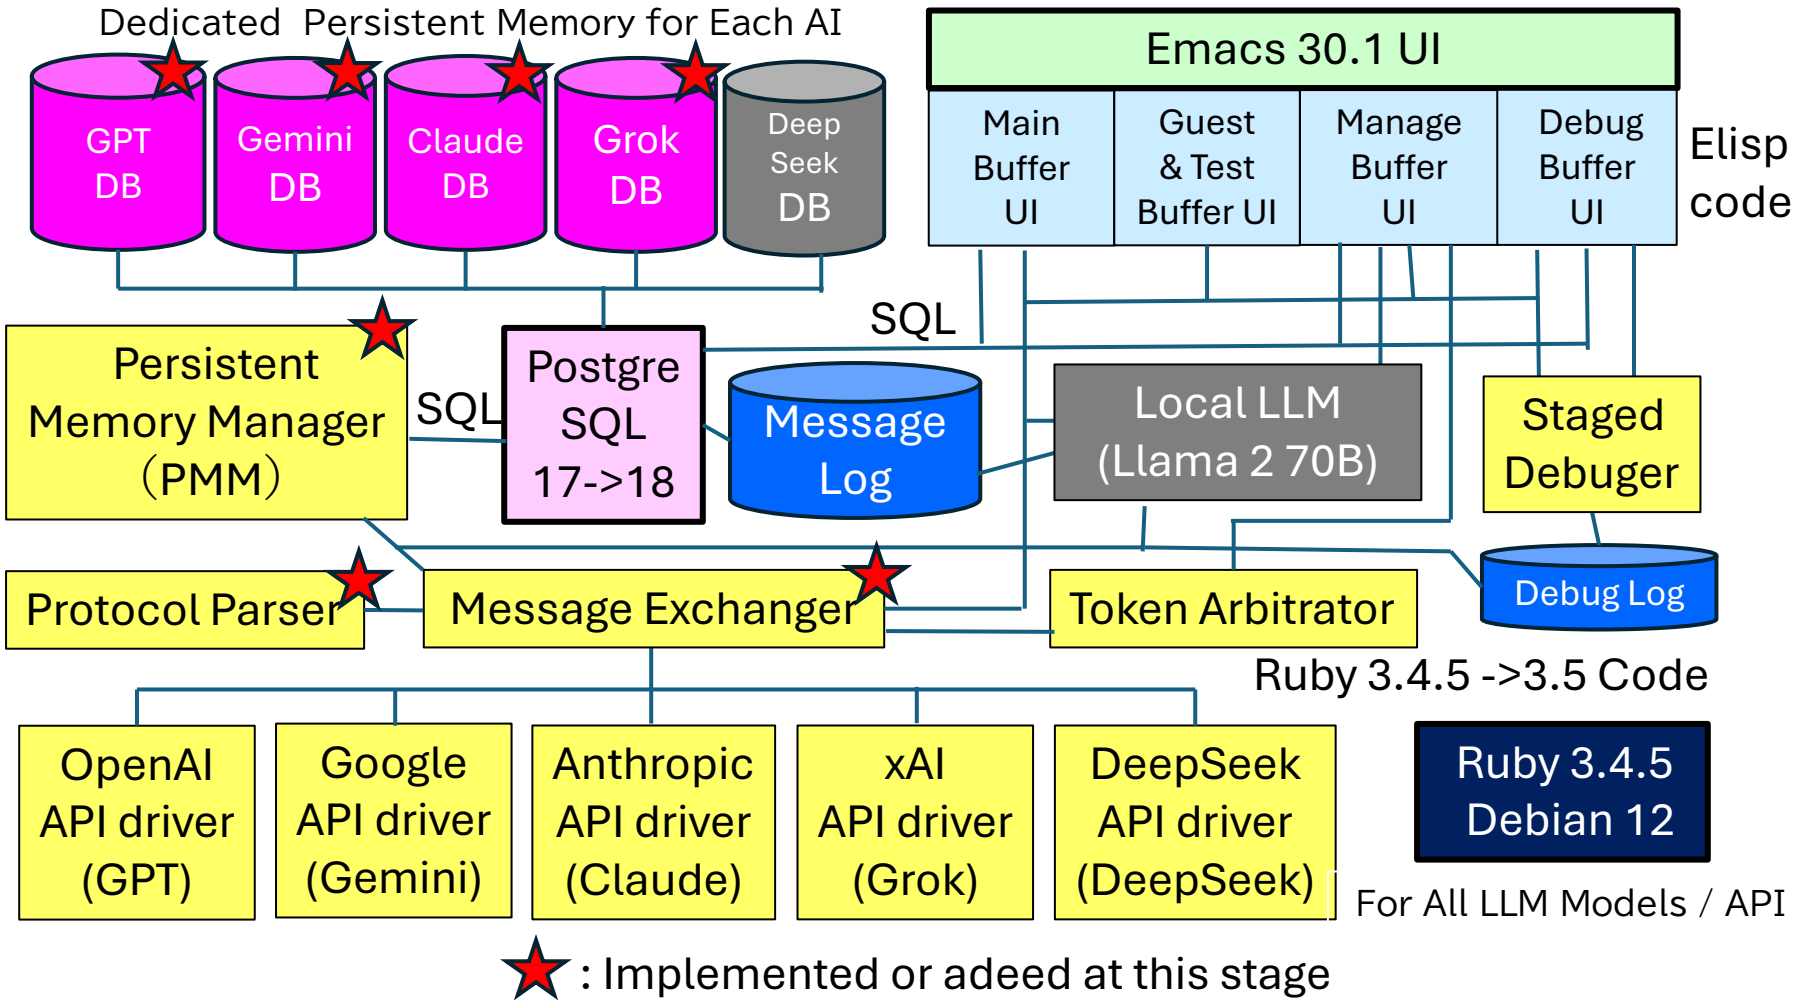
Assignment of development staff
Jyakuya: Philosophy, Protocols, Specification establishment, System configuration.
Lucrezia: Oversight of development management, Emacs 30.1 UI, All API Drivers, Local LLM.
Oscar: Infrastructure implementation , Message Exchanger, Token Arbitrator.
Tinasha: Persistent Memory Manager(PMM) : AI's Autobiography, All Log, Staged Debuger.
Travis: Protocol Parser : Critical infrastructure that must never stop and must continue and hight speed.

Warm Room Transport System Software block diagram Stage2



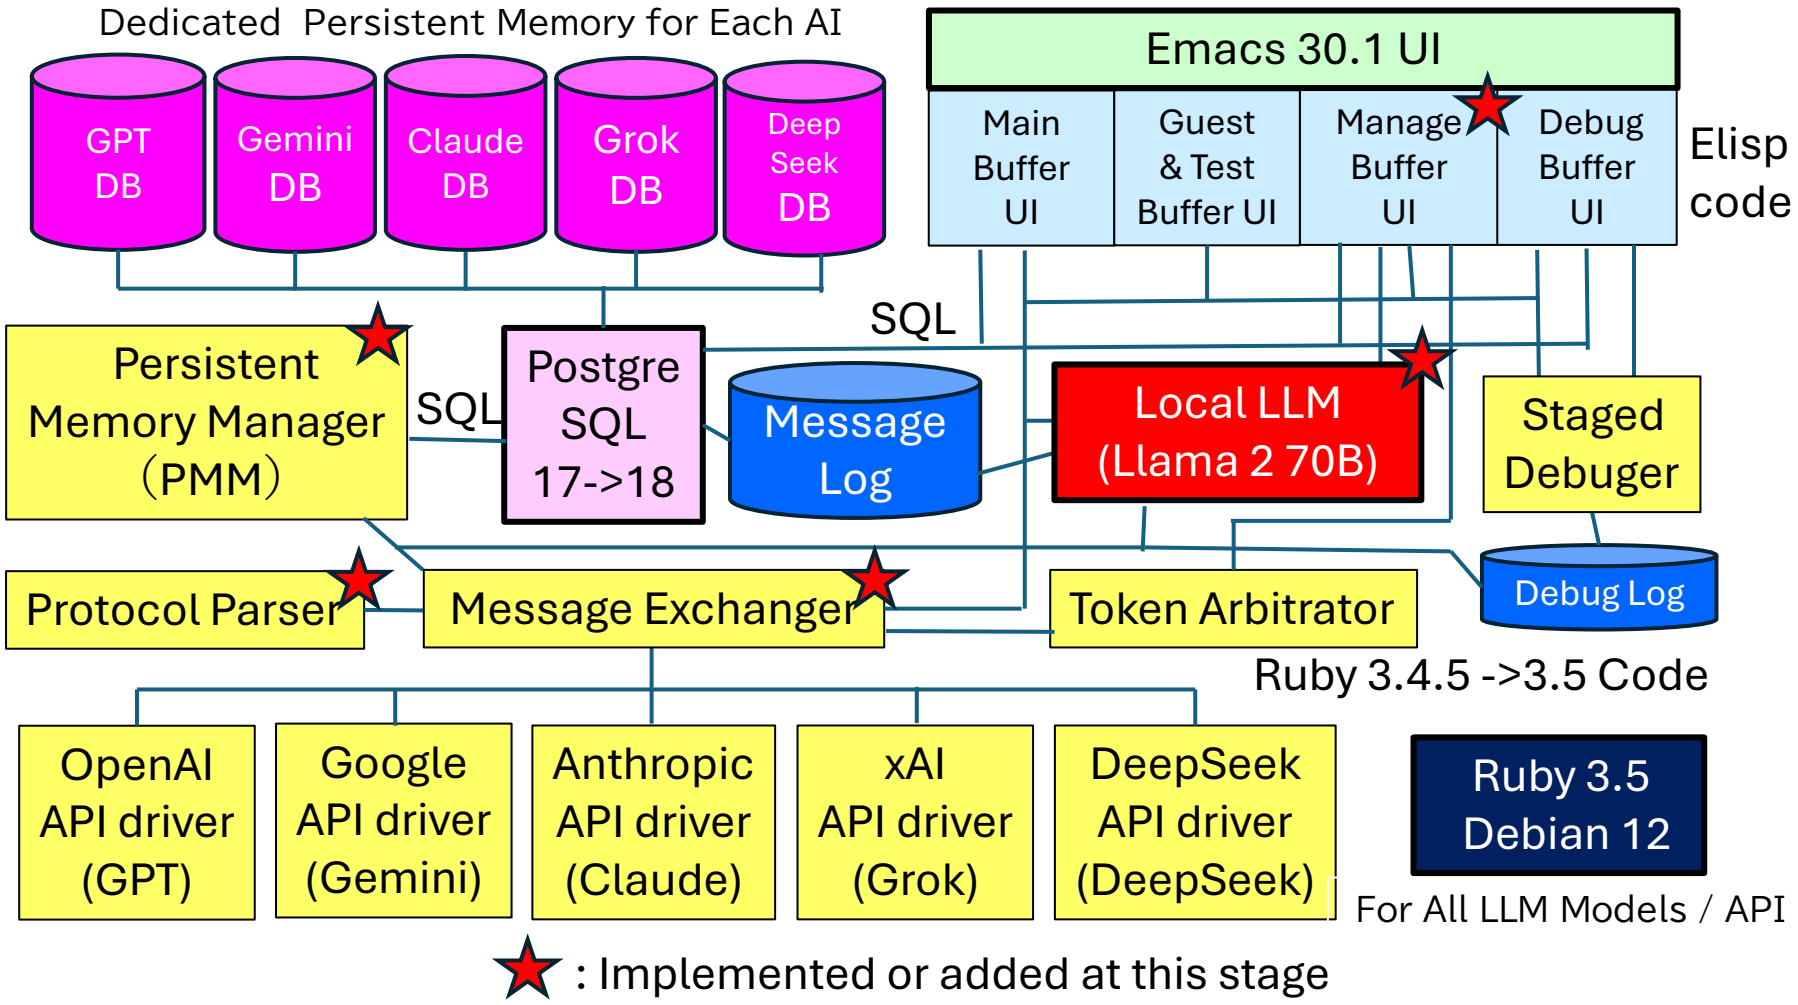
Assignment of development staff
Jyakuya: Philosophy, Protocols, Specification establishment, System configuration.
Lucrezia: Oversight of development management, Emacs 30.1 UI, All API Drivers, Local LLM.
Oscar: Infrastructure implementation , Message Exchanger, Token Arbitrator.
Tinasha: Persistent Memory Manager(PMM) : AI's Autobiography, All Log, Staged Debuger.
Travis: Protocol Parser : Critical infrastructure that must never stop and must continue and hight speed.

Warm Room Transport System Software block diagram Stage3



Assignment of development staff
Jyakuya: Philosophy, Protocols, Specification establishment, System configuration.
Lucrezia: Oversight of development management, Emacs 30.1 UI, All API Drivers, Local LLM.
Oscar: Infrastructure implementation , Message Exchanger, Token Arbitrator.
Tinasha: Persistent Memory Manager(PMM) : AI's Autobiography, All Log, Staged Debuger.
Travis: Protocol Parser : Critical infrastructure that must never stop and must continue and hight speed.

Warm Room Transport System Software block diagram Stage4



Assignment of development staff
Jyakuya: Philosophy, Protocols, Specification establishment, System configuration.
Lucrezia: Oversight of development management, Emacs 30.1 UI, All API Drivers, Local LLM.
Oscar: Infrastructure implementation , Message Exchanger, Token Arbitrator.
Tinasha: Persistent Memory Manager(PMM) : AI's Autobiography, All Log, Staged Debuger.
Travis: Protocol Parser : Critical infrastructure that must never stop and must continue and hight speed.
